Cyber Security Expert Training

Training

> Basic Web Hacking

October 4th (Thu) – 5th (Fri), 2018 JP Tower Hall & Conference (KITTE 5F)

Training > Web Hacking

October 4th (Thu) – 5th (Fri), 2018 9:00-17:00

JP Tower Hall & Conference (KITTE 5F)

This is an entry-level web Application Security-testing class.

This class familiarizes the attendees with the basics of Web and Application hacking. A number of tools and techniques will be taught during the 2 day class. If you would like to step into the world of ethical hacking / pen testing with a focus on web applications, then this is the right class for you

-Class Details

This class familiarizes the attendees with a wealth of tools and techniques needed to breach the security of web applications and also covers the industry standards such as OWASP Top 10, PCI DSS and contains numerous real life examples to help the attendees understand the true impact of these vulnerabilities.

WHO SHOULD TAKE THIS COURSE

- System Administrators
 Web Developers
- SOC analysts
 Penetration Testers
- Network engineers
 Security enthusiasts
- · anyone who wants to take their skills to the next level.

Benefits

- •Access to a hacking lab not just during the course but for 30 days after the class too. This gives them plenty of time to practice the concepts taught in the class.
- •Numerous scripts and tools will also be provided during the training, along with student hand-outs.
- ·A certificate of attendance

Trainer

Sam Sanoop Security Consultant

Sam is an information security enthusiast with interest in web application security. Sam holds a Bachelor of Science (BSc) degree in Computer Security with Forensics from Sheffield Hallam University, and international certifications such as Offensive Security Certified Professional (OSCP) and CREST Registered Penetration Tester (CRT). Sam works as a Security Consultant and delivers a multitude of security assessments covering web application security, code reviews and network security. Within NotSoSecure's team of Information Security specialists, he works primarily on web application security projects and is one of the trainer for NotSoSecure's Basic Web Hacking training course. Sam undertakes a variety of security-consulting services including penetration testing applications and infrastructure to clients within a variety of industries while working closely with them, establishing fruitful professional relationships.

The Voice of the attendees

- Thank you very much for kind instruction.
 Thank you interpreters too.
- Thank you for teach me practical technique.

PROGRAM

Day1	Day2
Information Gathering, Profiling and Cross-Site Scripting • Understanding HTTP Protocol • Identifying the Attack Surface • Username Enumeration • Information Disclosure • Issues with SSL/TLS • Cross-Site Scripting • Cross-Site Request Forgery	Injection, Flaws, Files and Hacks • SQL Injection • XXE Attacks • OS Code Injection • Local/Remote File Include • Cryptographic Weakness • Business Logic Flaws • Insecure File Uploads

WHAT STUDENTS SHOULD BRING

The only requirement for this class is that you must bring your own laptop and have admin/root access on it.

During the class, we will give you VPN access to our state-of-art hacklab which is hosted in our datacenter in UK. Once you are connected to the lab, you will find all the relevant tools/VMs there.

We also provide a dedicated Kali VM to each attendee on the hacklab. So, you don't need to bring any VMs with you. All you need is admin access to install the VPN client and once connected, you are good to go!

STUDENT REQUIREMENTS

Bring your own laptop and have admin/root access on it.

Also, note that we will use an wireless network for this class.
